

## Lake Pleasant Road Bridge Replacement

In the summer of 2019, the Hillsdale County Road Commission plans to replace the existing bridge on Lake Pleasant Road which is adjacent to the Lake Bel-Air Dam and Boat Launch entrance.

As this project will impact the Lake Bel-Air Association boat ramp entrance the Road Commission representative met with association board and building committee members to review the project.

During the construction of the new bridge this portion of Lake Pleasant Road will be closed. During the road closure access to the boat launch will remain open but will be impacted by construction activities. Please note while the new bridge is being constructed, we will be limited to approaching the boat ramp entrance from the south.

Along with installation of a new bridge there will be improvements to the road. The road will be widened by a few feet, along two to three hundred feet of the road, on both ends of the new bridge.

This road widening will make some changes to the association boat ramp entrance. To facilitate the wider road the county will be filling in the ditch along the association boat ramp property. While the boat ramp entrance will not be widened, entrance into the boat ramp area should be improved with the new wider road. Please note, all improvements to Lake Association property will be at the County's expense.

The project is currently in the planning phase. Contract award is planned for May 2019. Once the contractor has been selected, we can get a better understanding of the construction schedule and the contractor's plan for boat ramp access.

Please check the Lake Bel-Air Association Web Site at [lakebelair.org](http://lakebelair.org) for updates as they become available.
